

# Eclipse<sup>®</sup> NH Soft-Sided Dock Shelter

The Eclipse NH dock shelter, together with Rite-Hite's exclusive collapsible draft pads, offers effective trailer sealing at your loading dock openings.

**1 Seals trailer top:**

**Heavily weighted head curtain**

Creates a tight seal along full width of the trailer, using gravity to block gaps and maintain constant contact during trailer bounce. Self-adjusts to wide range of trailer heights. Diverts rain without the need for additional overhead device.

**2 Seals the corners:**

**Integral fabric sealing pockets**

Side curtains and weighted head curtain work together when trailer backs in for complete corner black-out. Sealing pockets connect sides to top, blocking gaps that other dock shelters cannot address.

**3 Seals the sides:**

**Advanced curtain sealing edge**

Side curtains feature exclusive Rite-Hite double-seal technology to provide tightest seal possible against sides of trailer.

**4 Seals the bottom corners:**

**Fully collapsible draft pads**

Rite-Hite's exclusive, extra durable, fully collapsible draft pads provide a barrier against environmental infiltration thru the both bottom corners at loading dock height. Gaps that would amount to over 0.50 m<sup>2</sup> of open air if left unsealed.

Rite-Hite<sup>®</sup> Eclipse NH Dock Shelter.

# Eclipse® NH Shelter (G5062NH)

Ordinary dock shelters leave gaps where contaminants can enter your facility and expensive energy can escape.

The Eclipse NH dock shelter effectively seals the gaps at the trailer top, corners, and sides, providing a complete, dark seal.

What does daylight mean at your loading dock? It means there are gaps in your environmental seal, holes through which contaminants can enter your facility and expensive energy can escape. Eclipse dock shelters are equipped to fully obscure daylight and effectively seal these gaps, in a single piece of equipment.

## Excellent for drive-thru applications.

Eclipse NH design lets trailer doors be opened inside the building for security or other purposes while maintaining the tightest seal possible in these applications.

## Works with varying trailer styles.

Advanced design features enable reliable sealing performance even when different trailer styles use the same loading dock position.

## Exclusive durability features.

Eclipse NH dock shelters are built to last at high-traffic loading docks. Side curtains are constructed of friction-resistant Durathon™ fabric so they hold up under extreme wear and tear. Super tough front impact plates protect weighted sealing header from trailer strikes. Poly-wrapped foam side frames can be impacted by off-center trailers without being damaged.
