

# Eclipse<sup>®</sup> Complete Sealing Soft-Sided Dock Shelter

The Eclipse shelter provides an advanced, highly effective seal at your loading dock.

Rite-Hite<sup>®</sup> Eclipse Dock Shelter.

**1 Seals trailer top:**

**Heavily weighted head curtain**

Creates a tight seal along full width of the trailer, using gravity to block gaps and maintain constant contact during trailer bounce. Self-adjusts to wide range of trailer heights. Diverts rain without the need for additional overhead device.

**2 Seals the corners:**

**Integral fabric sealing pockets**

Side curtains and weighted head curtain work together when trailer backs in for complete corner black-out. Sealing pockets connect sides to top, blocking gaps that other dock shelters cannot address.

**3 Seals the sides:**

**GapMaster<sup>™</sup> hooks**

Side curtains feature durable, detachable hooks to seal exposed trailer door hinge gaps without restricting access to loads. These gaps add up to over 0.25 m<sup>2</sup> of open air if left unsealed. Outer fabric sleeves conform around hinges for a tight side seal.

**4 Seals the bottom corners:**

**Fully collapsible draft pads**

Exposed bottom corner gaps add up to over 0.50 m<sup>2</sup> open air if left unsealed. Tough, fully XLPE (cross-linked polyethylene) foam design with Velcro and fasteners provide a secure attachment. Less susceptible to being torn off by trucks and trailers, providing more effective sealing over time as draft pad holds up better and longer.

# Eclipse® Dock Shelter (G5062G)

Ordinary (collapsible) dock shelters leave gaps where contaminants can enter your facility and expensive energy can escape.

The Eclipse dock shelter can effectively seal the gaps at the trailer top, corners, and sides, providing a complete, dark seal.

What does daylight mean at your loading dock? It means there are gaps in your environmental seal, holes through which contaminants can enter your facility and expensive energy can escape. The Eclipse dock shelter is equipped to fully obscure daylight and effectively seal these gaps, in a single piece of equipment.

## Exclusive durability features.

### » High-strength Durathon™ Fabric

Side curtains hold up under extreme wear and tear with the industry's only friction-resistant fabric with rugged pebble-grain surface.

### » Impactable Header

Durable wear panels protect weighted sealing header from trailer strikes. Pivoting header frame resists damage from trailers coming in off-center and higher than expected.

### » Slim, Crushable Side Frames

Take repeated hits from off-center trailers without damage or the need for expensive steel bumpers. Poly-wrapped foam side frames give unit stability, yet can be fully compressed — immediately returning to original shape and position if impacted.
