

Conquer supply chain complexity

The best-in-class supply chain
solutions to fit your size, business
strategy, and appetite for growth

Your supply chain is the lifeblood of your business

It's mission critical. A strategic advantage.

It's also increasingly complex. You're handling more products, from more suppliers, and fulfilling through more channels. Your customers have ever-higher expectations for choice, convenience, speed... and of course, price.

At the same time, it's harder than ever to recruit people, train them, retain them, and grow their skills. And as these pressures grow, so does the competition. To get ahead and stay ahead, you have to move even faster.

Technology can help. But besides the cost, there's implementation, integration, maintenance, upgrades, training... without a sound strategy, simply adding technology just adds more complexity.

That's why you need more than a vendor... you need a global partner with a proven track record of delivering efficiency and a lower cost of ownership – plus the flexibility, agility and innovation to help you realize your strategic roadmap. Today, tomorrow and beyond.

That partner is Körber. And our mission is to help you conquer supply chain complexity.

We'll help you manage your supply chain as a competitive advantage. A strategic asset. An opportunity to excel. From one end of the supply chain to the other, Körber conquers complexity.
koerber-supplychain.com

While others offer point solutions, at Körber, we have a broad range of technologies for your needs

Supply chain software

From warehouse simulation to transportation management and proof of delivery, Körber provides full insight and management of distribution systems.

- Manage warehouses, factory yards, industrial plants, marine terminals and transportation fleets
- Maximize worker productivity and improve operational efficiencies
- Increase accuracy and transparency across workflows to meet regulatory and compliance requirements

Automation

By designing and implementing automated solutions, Körber streamlines warehouse operations.

- Benefit from holistic, technology-agnostic solutions integrated by experienced engineers
- Design workflows built for heightening demands, tighter delivery windows and omnichannel fulfillment
- Tap into AI and advanced data analytics to uncover actionable insights to enhance workflows

Voice, vision & mobility

Innovating warehouse operations with hands- and eyes-free technologies from Körber improves efficiency for a high return on investment in a short time.

- Boost worker productivity, accuracy and safety
- Increase visibility into warehouse activities with real-time data updates
- Optimize workflows to get the most out of your workforce during peak periods

Robotics

Bring a new level of performance and precision to your warehouse floor by implementing robotic solutions from Körber.

- Deploy articulated arm robots, layer palletizers, and full Autonomous Mobile Robots (AMR)
- Cost effectively add new robots as demand dictates to drive efficiencies
- Use existing cameras and sensors to operate AMRs without instruction

Materials handling

From the most automated warehouse to one utilizing a single robotic arm, Körber offers a full range of materials handling equipment to move inventory through your warehouse.

- Meet diverse and time-bound customer demands
- Store and retrieve goods quickly while maximizing space
- Move goods across different workstations efficiently and safely

Software consulting & implementation

With decades of experience bringing some of the world's most complex supply chains online, Körber transforms operations with minimal disruption and supports evolving business environments.

- Gain access to knowledgeable consultants and resources
- Implement innovative technology solutions through system concepting and design services
- Enhance team skillsets through expert trainings

SAP consulting & implementation

With extensive SAP logistics applications knowledge, Körber addresses your supply chain challenges, providing complete and seamless supply chain integration.

- Access a comprehensive suite of solutions and add-ons
- Future proof your supply chain with the latest industry standards, including SAP S/4HANA
- Reduce data entry complexity while improving data security and consistency

Körber offers an array of proven technologies – plus the expertise to deliver complete system integration. End-to-end. Worldwide.

Our deep industry expertise ties it all together...

For more than two decades, Körber has been at the forefront of the supply chain industry.

With experience in a variety of fields and industries, we've completed thousands of installations worldwide. Our team of 10,000 employees in 100 production, service and sales sites combines a global footprint with a local presence, helping you make smart decisions about what to

invest in now, and how to optimize as your needs continue to evolve.

Plus, we have access to a global network of logistics systems companies and partners ready to help you succeed – wherever you are. No matter your supply chain needs, our team of technology providers, systems integrators and consultants can help you solve your business problems.

Strategic partners

System integrators

Technology alliances

Channel partners

... and keeps thousands of supply chains around the world moving
