Global Cold Chain Alliance
Annual Report 2023

A global platform for communication, networking, and education for each link of the cold chain.
A message from your 2023 Chairmen

2023 has been a record-breaking year for your Associations. With the largest-ever participation in our events and training programs, high-impact advocacy campaigns and the most ever meetings held in a single year across the world, we have never been more confident in our purpose to bring the world of cold chain together.

The warehouse, transportation, and construction services have been the quiet and dependable link in our food supply chain for years. Recently, there has been growing attention towards this industry due to world instability and questions about supply chain security. GCCA, GCCF and CEBA are well-positioned to represent the sector’s best practices globally. We have also seen some big success in our role as a voice for cold chain.

The GCCA played a lead role in introducing the FRIDGE Act into the US Congress, highlighting the importance of public/private investment in global imports/exports. The Act is a landmark legislation and an example of our growing impact.

GCCA is member-owned and run, with business leaders volunteering their time to ensure the organization is effective, responsive and focused on the needs of cold chain professionals worldwide. We thank all our colleagues for their invaluable contributions.

As we hand over our Chairmanships to our successors, we want to thank our dedicated staff team, and we know that 2024 will see GCCA go from strength to strength.

In your report

2 Chairman’s message
3 A unique alliance Our mission, purpose and structure
4 Your voice A recap of our advocacy opportunities
6 Bringing people together Highlights from our busy calendar or visits and events
9 Making connections GCCA bringing people together across the world
10 Setting the standard Explaining the Energy Excellence and Cold Carrier programs
11 Knowledge bank Key resources available to GCCA members
12 Developing leaders A review of our Institute and Next Generation award
14 Making a difference Developing the cold chain and reducing food loss and waste
16 Building the best Reviewing the year at CEBA
18 Be what you can see Championing the female leaders shaping the global cold chain
19 Our leaders Introducing your 2024 leadership volunteers
23 Be there in 2024 The 2024 calendar or must-attend events across the world

A unique alliance

The Global Cold Chain Alliance (GCCA) exists to help its members build and strengthen the temperature-controlled supply chain worldwide. We do this by bringing third-party warehouse and transportation business leaders together in events and networking activities, providing advisory and educational services, and being a voice of cold chain to government regulators and other influencers around the world.

The Global Cold Chain Foundation’s (GCCF) mission is to strengthen the global cold chain through education, research, and international development. Cold Chain Institute trains industry practitioners in the best practices of temperature-controlled product storage, handling, and transportation. Research manuals developed by the foundation serve as the definitive guide for the proper handling, storage, and freezing of perishable products as well as energy and facility management.

International development projects engage industry professionals in the development of cold chain infrastructure in emerging markets.

And a key partner to GCCA is the Controlled Environment Building Association (CEBA). CEBA’s mission is to represent expert builders who specialise in designing and constructing controlled environment buildings, including cold storage warehouses, food processing facilities, clean rooms, pharmaceutical facilities, food service, and retail distribution centres. With a strong value proposition and growth momentum, industry participation in CEBA programs has doubled since pre-pandemic levels.

Together we are the cold chain.

1500+ Member companies
91 Countries
1000+ Member facilities
Your voice

Across the world GCCA brought people together to tell the story of cold chain and promote initiatives that defend our industry and promote positive initiatives that will help our industry deliver for its customers and the wider economy.

The recent global pandemic has highlighted the critical role that the supply chain plays in ensuring reliable access to critical goods such as food and pharmaceuticals. As a result, governments across the globe are considering policies to strengthen supply chains. GCCA is engaging with policy makers to ensure that the cold chain is incorporated into those discussions. For example, in Canada, GCCA is working closely with Transport Canada as it establishes a new Supply Chain Office. In addition, GCCA members have been named to two key Agriculture and Agri-Food Canada advisory councils focused on food supply chain issues. GCCA has also participated in numerous government consultations and provided industry insights during supply chain disruptions such as the recent port strike in British Columbia.

The cold chain industry is heavily regulated across the various regions of the world. GCCA is striving to work with regulators to strike the right balance to achieve appropriate regulatory goals without overburdening industry. In Brazil, GCCA is working with the Ministry of Agriculture to pursue a regulatory change to allow refrigerated warehouses to conduct blast freezing, which is not currently permitted. GCCA is also promoting regulations and policies to improve the flow of meat and poultry exports from Brazil.
Bringing people together

2023 saw our organisation bring more cold chain professionals together than ever across the world for education, training and networking. From the record-breaking GCCA Annual Convention in Scottsdale, Arizona with over 525 attendees to leading conferences and congresses in Barcelona, Cape Town, São Paulo and Cancún. No other association provides opportunities like these.

**Annual Convention | Scottsdale, Arizona, United States | 24 SEP ’23**

The 132nd International meeting of cold chain executives

500+ delegates

Discussion on leading industry issues and the largest ever supplier showcase

Resilient leadership inspiration from Sarah Thomas, the first-ever female referee in NFL history

**European Cold Chain Conference | Barcelona, Spain | 21-22 MAR ’23**

Delegates from 22 different countries

Insights on the latest market trends

Creating experiences in beautiful historic surroundings

**African Cold Chain Conference | Cape Town, South Africa | 2-4 AUG ’23**

Coping with adversity, focused on growth

Golfing delegates competed for the Cold Chain Cup Africa

JOIN US! 133rd GCCA Convention 23-26 Sep 2024

Bonita Springs, Florida
2023 saw more cold chain professionals together than ever across the world for education, training and networking. From the record-breaking GCCA Annual Convention in Scottsdale, Arizona with over 525 attendees to leading conferences and congresses in Barcelona, Cape Town, São Paulo and Cancun … no other association provides opportunities like these.

We are proud to be on the ground organising study tours and trainings to develop the cold chain at facilities and operations across the world.

Making connections

Wow! What a great day! Bogotá, Colombia

Reflections on dynamic change across the market

Making connections and opening markets

¡Bienvenidos a México City!
Setting the standard

GCCA members aspire to the highest standards and to help them we provide our members with unique programs to benchmark and certify their performance. Our Energy Excellence and Cold Carrier programs went from strength to strength in 2023.

Energy Excellence

Managing energy usage is a high priority for temperature-controlled warehouse operators: to control costs – energy is the second highest operating cost behind labor in the cold chain industry – but also to meet industry demands for increased sustainability impact.

GCCA’s Energy Excellence Recognition Program (EERP) helps you measure and improve energy efficiency at each of your facilities using qualitative and quantitative assessment tools.

The EERP is also a tool you can use to communicate your facility’s progress in meeting sustainability objectives to your customers, allowing you to be a better partner in overall cold chain sustainability.

It’s easy:

STEP 1 Complete the application
STEP 2 Enter energy data into online portal
STEP 3 Complete energy self-assessment
STEP 4 Designate management team to participate
STEP 5 Receive recognition for the award level achieved
STEP 6 Renew annually

Cold Carrier

No matter where you are on the globe, aligning your company with the U.S. Food Safety Modernization Act (FSMA) best practices is accomplished with this GCCA program designed to recognize carrier organizations for their commitment to sanitary and safe transportation of perishable products.

It’s easy:

STEP 1 Implement best practices found in the Refrigerated Transportation Best Practices Guide.
STEP 2 Complete the application
STEP 3 Submit a Quality Assurance Manual
STEP 4 Designate management team to participate
STEP 5 Receive recognition
STEP 6 Renew every three years

Knowledge bank

Access to the many different tools and resources for GCCA members got so much easier in 2023 with the launch of the new GCCA website. With a new user–friendly member interface, it provides at-a-click access to all the vital tools available to GCCA members.

Inquiry Service

Backed by the Foundation’s Council of Scientific Advisors, which is an eminent group of food scientists, logistics, and packaging experts from around the world. The Inquiry service is a way to get answers to difficult questions from food safety standards, refrigeration or export rules.

Cost to Freeze Calculator

A quick, user-friendly calculator for warehouse managers to determine the best way and means to store product. The calculator includes information on nearly 1000 specific products in twelve different product categories.

Council of Scientific Advisors

GCCA is supported by leading international experts from a range of universities across the world. Our experts help answer inquiries, provide advice on our work and take part in our events through the year.

- Dr. Michael Jahncke – Virginia Seafood Agricultural Research & Extension Center
- Dr. Jeffrey Brecht, University of Florida
- Dr. Patrick Brecht, PEB Commodities
- Dr. Paul Dawson, Clemson University
- Dr. Donald Fenton, Kansas State University
- Dr. Brian Fugate, University of Arkansas
- Dr. Cody Gilford, University of Wyoming
- Dr. Dennis Heldman, The Ohio State University
- Dr. Faris Karim, Kansas State University
- Dr. Barbara Rasco, University of Wyoming
- Dr. Kees Jan Roodbergen, University of Groningen
- Dr. Vicky Salin, Texas A&M University
- Dr. Subramaniam Sathivel, Louisiana State University
- Dr. S. Paul Singh, Michigan State University
- Dr. Donald Schaffner, Rutgers, The State University of New Jersey
- Dr. Charles White, Mississippi State University
Developing leaders

For 59 years, the foundation has supported the cold chain by training and developing the leaders of tomorrow. The Cold Chain Institute is a unique, three-year learning experience for up-and-coming cold chain professionals to work through a curriculum covering all aspects of cold chain management, taught by practitioners and experts. It is something special, and lots of fun too.

Record breaking | Institutes North America

A total of 417 students joined with 50 faculty and staff at the Cold Chain Institute North America in Atlanta, Georgia and Tempe, Arizona. More than 80 students graduated from the three-year program.

Back in business | Institute Australia

Institute Australia reconvened after a COVID-disrupted break, seven students returned for a year two program and 20 more joined year one.

Learning and networking | Institute LatAm

This year’s Institute in Mexico City gave students the chance to mingle with senior executives at the co-located Cold Chain Connection networking event.

Recognizing talent

We were proud to showcase and reward some of the best talent in the global cold chain with our Next Generation award. Stacey Cook of NewCold Australia emerged as the overall winner from an inspiring group of winners from each region.

Congratulations to all our Institute graduates!

Markets Program in Southeast Asia

From 2019 to 2023, GCCF’s Emerging Markets Program wraps up a successful Emerging Markets Program across the world – here are two highlights:

The Global Cold Chain Foundation continued to live its purpose in 2023. With exciting projects ongoing across the world – here are two highlights:

The GCCF Food Maximization Initiative was started in 2022 to help food rescue organizations through the Food Maximization Initiative. This program has three objectives: to expand access to GCCA’s resources, remove barriers for collaboration between food rescue groups and the refrigerated logistics industry, and increase awareness among members about food loss and waste.

Tackling food waste head on

A disaster relief organization, Operation BBQ Relief received an unexpected donation of 150 pallets of frozen pork. Contacted by American Logistics Aid Network, GCCA found a home for the donation at United States Cold Storage who agreed to hold the product for seven months. GCCA member CORE X Premier has also set aside 150 pallets of refrigerated warehouse space in Fort Worth, Texas for the nonprofit to be used as needed.

In Kenya, Newton Mapote, President of BigCold has advised Food Banking Kenya (FBK) for several years, providing FBK with temporary temperature-controlled storage, free consultancy on warehousing specifications, assisted with the negotiations on pricing with suppliers of equipment as well as training of staff on warehousing and stock control.

GCCA has drafted 22 recommendations for food rescue groups and GCCA members. GCCA has established a solid foundation to build out additional member-driven ideas and opportunities to reduce food loss and waste.
Building the best

It has been a year of growth and change for the Controlled Environment Building Association. We have a clear strategic plan, significant membership growth, our biggest-ever Conference and Expo and new products developed and ready to launch. There has never been a better time for construction contractors and suppliers to get involved with CEBA.

Celebrating excellence

Recognising the increased level of competition and outstanding work submitted for 2023, the Built By The Best awards saw nine excellent projects vying for the two awards, one for a project under $35 million and one for a more than $35 million project. The winners were announced at the 2023 CEBA Conference with Fisher Construction Group taking first place in the over $35 million project category and Ti Cold went home with first place in the under $35 million group.

Under $35 million Winner | Ti Cold | Sturbridge, Massachusetts, USA

Core X Partners hired Ti Cold to plan a high-density, 83,000-square-foot cold storage facility with 17,700 pallet positions in Sturbridge, Massachusetts.

The Core X Complete facility was selected as the winner of the Built By The Best due to its innovative features like convertible rooms cooled by transcritical CO₂ refrigeration.

Under $35 million Finalist | WDS Construction | Vortex Cold Storage, Albert Lea, MN, United States

Over $35 million Finalist | Ti Cold | Sierra Supply Chain Services, Hamilton, ON, Canada

The NewCold facility won the Built By The Best award in the over $35 million category. It is a 464,646-square-foot Indianapolis cold storage facility that uses state-of-the-art technology, including automated storage and retrieval systems (ASRS) to move and store products in the dark high-bay warehouse. The facility is unique in its design for its size and scale, almost total automation of product storage and retrieval, and an alternative method used for fire protection within the freezer environment.

Over $35 million Winner | Fisher Construction Group | Indianapolis, Indiana, USA

The NewCold facility won the Built By The Best award in the over $35 million category. It is a 464,646-square-foot Indianapolis cold storage facility that uses state-of-the-art technology, including automated storage and retrieval systems (ASRS) to move and store products in the dark high-bay warehouse. The facility is unique in its design for its size and scale, almost total automation of product storage and retrieval, and an alternative method used for fire protection within the freezer environment.

We would also like to recognize our fantastic Honorable Mentions from across the world.

• AMC Engineers | Pick n’ Pay, Eastport, Gauteng, South Africa
• Big D Construction | Riverbend Meats, Idaho Falls, ID, United States
• Eng2K | NewCold, Piacenza, Italy
• FCL Builders | Cold Summit Development, Bedford Park, IL, United States
• Primus Builders | RL Cold, Baytown, TX, United States

In 2024 we bring you another packed schedule of events bringing people together, learning and sharing insights around the world.

Global Cold Chain Foundation
Cold Chain Institute

This event, designed for employees with clear management potential and executives new to the industry, features more than 40 classes in warehouse management and transportation management taught by leading experts in the industry.

Who are the Institutes for?
Warehouse and operations managers, supervisors, shift leads, customer service and transportation managers, workers with management potential, and new industry executives.

GCCA Convention, Conferences and Congresses

At GCCA meetings, delegates hear talks on market trends, industry challenges, business solutions, and technological innovations. They also get exclusive networking opportunities to connect with professionals from across the region and the world.

Who are the Conventions, Congresses and Conferences for?
Executives and managers from temperature-controlled, third-party logistics companies and senior executives in supplier and other service providers.

GCCA Policy Forum

The GCCA Policy Forum is an annual event that focuses on legislative and regulatory policy developments in the US. Members engage with government officials about key legislation and regulations affecting the cold chain.

Who’s the event for?
Executives with compliance and regulatory responsibility, members of safety and government affairs committees.

CEBA Conference and Expo

This annual meeting of CEBA members offers education, business development opportunities and networking for company executives managing the building of new cold storage facilities and cold storage builders.

Who’s the event for?
Executives and leaders that work for general contractors, thermal contractors, sub contractors, suppliers/solutions providers, and project management, engineering, maintenance and development executives at end user organizations and other stakeholders involved in the controlled environment building industry.
