

CEBA Professional Certificate Holders

CEBA Professional Certificate Holders are professionals with a thorough knowledge of the fundamental concepts, terminology, techniques, and elements uniquely related to the construction and design of a controlled environment facility.

The CEBA Professional Certificate Program teaches learning modules to understand the construction, maintenance, and management of controlled-environment facilities, including product safety regulations, building design concepts, controlled-environment building control systems, and energy and environmental impacts. Students must complete an assessment exam to show that they have attained the certificate program's learning outcomes.

Below is the official current list of CEBA Professionals:

Name	Company	Certificate ID	Expiration Date
Rene Boado	Coldbox	CH-CEBA Professional-S0002	December 31, 2027
Erin Bullin	ARCOLD Design/Build	CH-CEBA Professional-S0003	December 31, 2027
Roy Carl	Controlled Environment Systems	CH-CEBA Professional-S0501	December 31, 2027

About the Controlled Environment Building Association (CEBA)

Founded in 1978, the Controlled Environment Building Association (CEBA) represents the expert builders who specialize in the design and construction of controlled environment buildings, including cold storage warehouses, food processing facilities, clean rooms, pharmaceutical facilities, and foodservice and retail distribution centers. CEBA is where anyone looking to build, renovate, or modernize a first-rate, innovative facility comes to find the most experienced designers, contractors, and manufacturers and suppliers. CEBA is a Core Partner of the Global Cold Chain Alliance (GCCA). Learn more at www.gcca.org.
